DETAILED ACTION

Election/Restrictions

1. Claims 1-7 and 9-20 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claim 8, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, is hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 5/20/2008 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the closest prior art known to the Examiner is listed on the attached PTO 892 and 1449 forms. As

Art Unit: 1796

noted in the previous Office Action, the Examiner had rejected the claims under 102/103 as being drawn to product by process limitations over Seiichi et al. and also noted a 103 rejection over Seiichi in view of Bisaria suggesting said process limitations were result effective variables that could be optimized to produce the claimed compositions. The Examiner, however, has considered the comparative data shown in Tables 1, Exs. 1-5 and 2, Comparative Exs. 1-7 of the instant Specification and concluded that the selection of the graphite particle sizes and weight sections in conjunction with the process parameters designated have resulted in compositions yielding superior and unexpected results, specifically good moldability and processability (via melt viscosities) and low volume resistivity. The Examiner concludes that said showing is sufficient to rebut any presumption of obviousness with respect to any process conditions described in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaison P. Thomas whose telephone number is (571) 272-8917. The examiner can normally be reached on Mon-Fri 9:30 am to 6:00 pm.
